BUILDING GROUP

Exceeding Client Expectations
One Project at a Time.

OUR STORY

JAG Building Group, Inc., is a North American leader in retail construction. JAG's mission is "Measuring Success by Exceeding Client Expectations, One Project at a Time."

We know the expectations of each client are unique and we welcome the opportunity to discuss tailoring a program to fit your requirements. A North American leader in retail construction and renovation, we specialize in both fast-casual restaurants and fashion retail stores.

Our goal is to apply our industry knowledge in helping our clients to open their locations more efficiently, while driving down costs. We look to partner with growing companies, become experts in their scope of work and lower overall costs thus becoming their preferred general contractor in North America.

This methodology has led us to repeat business doing both tenant fit-out and renovations (roll-outs) for national brands such as; Michael Kors, American Eagle, Aeropostale, Nautica, Land's End, Kay Jewelers, Five Guys, Blaze Pizza and others.

We believe that relationships are important and that having a solid, experienced and trusted general contractor who can supervise your growth anywhere in North America can be a valuable tool for your company.

In the spirit of giving back to the local communities where we work, we use local sub-contractors who are well-versed in working with the local municipalities and have an interest for the project to succeed in their local community. We look forward to bidding your next project and "building" a lasting relationship.

WHAT WE DO

JAG Building Group is a General Contractor licensed to work in 46 states plus all of Canada (parent headquarters in Toronto). We provide the following services:

- Site Surveys and Permitting
- Interior Tenant Finishing
- Roll-Out Planning & Execution
- Major & Minor Remodels
- Union and Non-Union Projects

RESTAURANTS & RETAIL

We specialize in both fast-casual restaurants and fashion retail stores. Since 1995 in Canada and 2013 in the United States, we have completed thousands of projects for major international clients.

Restaurant builds are fast-paced, complex and offer challenging schedules. We have an experienced management team that speaks your language from estimating to close-out which sets us apart from much of our competition. All our construction managers gained years of experience from working in the field in various trade capacities. We bring in our site supervisors to stay on a project from start to completion, while using local sub-contractors who are well-versed in working with the local municipalities, thus saving our clients expenses while providing experienced and skilled supervisors who understand your scope of work from project to project.

RENOVATIONS / ROLL-OUTS

We use the same team approach for these high-volume fast-paced remodels that occur while the client is still in operation. Our crew is capable of rolling out dozens of locations simultaneously while being sure that the décor packages are completed on a timely basis.

Measuring Success by Exceeding Client Expectations, One Project at a Time.
